### UNWINDER & REWINDER FOR EPSON TM-C3400/TM-C3500 PRINTERS

The unwinder and rewriter for Epson TM-C3400 / TM-C3500 printers are used to manage rolls of media up to 127mm, while having an outside diameter up to 250mm. The user can select among the adjustable core holder from 40mm up to 118mm, and the 3" fixed.

To guarantee an aligned media path in the system, the printer plate is available to connect the rewriter and unwinder together. It also offers a customized sliding support where lean and fix the Epson printer.

An external power supply 100/240VAC - 2.5A  $\overline{\text{~}}$  at 24V allows an electronic circuit to provide, through the tension arm, the adjustment of the rotation speed and rotation direction. A 2A fuse is used as protection.

The unwinder and rewriter for the Epson TM-C3400 / TM-C3500 printers have two types of speed adjustments: it is possible to set the main speed through a knob and the tension arm automatically adjusts the speed from zero, up to the desired speed. When the roll runs out, each device stops beeping.

#### LABEL UNWINDER

The position of the tension arm is calibrated as follows:

- When the printer forwards the media for printing, the tension arm goes up, the device unwinds the media.
- When the tension arm is in the middle position, the device is idle.
- When the printer pulls back the media, the tension arm goes down, the device rewinds it.

#### LABEL REWINDER

The position of the tension arm is calibrated as follows:

- When the printer forwards the media for printing, the tension arm goes down, the device rewinds the media.
- When the tension arm is in the middle position, the device is idle.
- When the printer pulls back the media, the tension arm goes up, the device unwinds it.
